DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4, 7, 8, 13, 14, 18, 19, 22, 24, 25, and 27-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Hobbs et al. (US Patent 5,770,135). In example 3, Hobbs et al. discloses the basic limitations claimed by extruding a parison of HDPE while purging the interior of the parison: controlling the temperature of the blow mold temperature 40.5°C; blow molding the parison with fluorine gas to form a container; purging the containers with nitrogen; and depressurizing and releasing the container from the mold (column 6, lines 43-68).

Allowable Subject Matter

3. Claims 2, 3, 5, 9-12, 15-17, 20, 23, and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
